DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoo et al. (US. 5,605,853) in view of Mehta (US. 5,679,559)

In regards to claims 1, 5, and 9, in fig. 7, Yoo et al. discloses a common substrate 10;

an SRAM device 50 implemented on the common substrate and isolated by LOCOS isolation technique 12; and

a flash EPROM device 70 implemented on the common substrate 10 and isolated by LOCOS isolation technique 12.

Yoo et al., however, does not expressly disclose a second isolation technique such as STI to isolate the devices. Mehta, in fig. 18, teaches a first and second isolation techniques 242, 240 to separate the devices on the same substrate in order to scale the minimum spacing between regions, please see col. 6, last paragraph.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use STI isolation technique as taught by Mehta in Yoo et al. substrate in order to scale the minimum spacing between regions.

In regards to claims 2-3 and 7-8, Mehta discloses the first technique is the STI technique and the second isolation technique is LOCOS isolation, as discussed in claim 1 above.

In regards to claims 4, 6, and 10, Yoo et al. discloses SRAM coupled EPROM for transmitting signals, see fig. 7.

Response to Arguments

3. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
